                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                syndrome); musculo-skeletal disorders (arthritis, trauma, tendonitis); renal disorders (nephrotic syndrome, glomerulonephritis); metastases of malignancies and related disorders (leukaemia, multiple myeloma); and infections caused by bacteria, viruses, fungi and parasities. PTK is also useful for screening therapeutic compounds. PTK is used as an antigen in a vaccine to raise an immune response against infectious disease. PTK
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   atherosclerosis); central nervous system disorders (multiple sclerosis) neurodegenerative disorders (Alzheimer's disease, Parkinson's disease); blood coagulation disorders (thrombocytopalenia); autoimmune disorders (billary cirrhosis, Crohn's disease); respiratory disorders (asthma, allergy); gastrointestinal disorders (inflammatory bowel disease); cerebrovascular disorders (thrombosis, wascular dementia); brain
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The present cDNA sequence encodes human protein tyrosine kinase receptor (PTK) from clone HDPSB68.

The invention relates to human protein tyrosine kinase (PTK) receptors and their corresponding cDNA molecules. PTK receptors are useful in providing immunological probes for differential identification of the tissues or cell types present in a biological sample. PTK is used in methods for the diagnosis, prevention and treatment of various disorders related to PTK such as immune system disorders (severe combined immunodeficiency (SCID), inflammation); hyperproliferative disorders (neoplasm, sarcoidosis); cardiovascular disorders (arrhythmia, complasm, 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             nucleic acids are useful in gene therapy.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Direct Submission
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          NOTE: This is a 'working draft' sequence. It currently consists of 3 contigs. The true order of the pieces is not known and their order in this sequence record is
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               (bases 1 to 178876)

It currently consists of 12 contigs. The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence.

                                                                                                                                                                                                                                       NOTE: This is a 'working draft' sequence. It currently consists of 8 contigs. The true order of the places is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  repeats were identified using RepeatMasker:
